Oggiona Santo Stefano, July 2014

Subject: Company profile presentation

Three historical major brands of the Italian weighing industry: **Quadrelli**, founded in 1919; **Laveggio**, in 1842 and **Buroni Opassi**, in 1773, have been merged in 2005 to form **Cogo Balance Srl**.

The desire to join together under a common brand all the most prestigious companies of the Italian weighing industry, has led Cogo Balance to acquire **Fulgor** in 2008.

From 2009 the **Iemmegi** company, leader in the end of line automation and checkweighers, is also part of Cogo Balance.

The result of this grouping makes our experience in the weighing an history more than three hundred years old.

Innovation and customer satisfaction represent our tradition since the beginning and have always been one of our main priorities, therefore we can state that Cogo Balance is a "custom oriented" company.

Cogo Balance plans and produces both the mechanical and the hardware/software electronic parts, we have not only a wide range of standard products but also the ability to realize customized solutions or specific programs in order to meet almost every customer requirement.

As standard products we mention steel and concrete weighbridges, railway weighbridges, big and small size floor scales, platforms, bench scales, price computing and counting scales, crane scales, hand pallet truck scales, mobile weighing systems, load cells and A/D signal conditioners.

Exclusive Cogo Balance products such as patented carbon-reinforced composite platforms, solar panel powered weighing systems, PC based weighing systems and a wide range of multi-function weight indicators & transmitters are also worthy to be mentioned.

Most part of the equipments in our product range can have the 'legal for trade' mark.

Training courses are constantly organized in order to always stay in the market at the highest level of quality.

We have approximately 30 authorized service points in Italy and abroad, they are able not only carry out pre and post-sales activities, but also to make maintenance services and calibration any weighing equipment to the aims of the quality certification.

Thanks to our ISO 9001:2000 Quality System we have been authorized to calibrate, test and certify the weighing equipments on our own.

Moreover our Metrological Laboratory has obtained the authorization to perform the periodic metrological verifications.
